Project Title: AI-Powered Job Portal with Resume Builder, Mock Interview & Hiring Dashboard

1. Introduction

This document describes the **End-to-End requirements** for an **AI-powered job portal** where **job seekers** and **companies** can interact in a single platform.
From **login** to **final interview decision and feedback**, the system supports:

- **Resume building & AI-based analysis** (ATS-style score, keyword match, gaps)
- **AI-based mock interview** (practice + official)
- **AI-filtered job recommendations**
- **Company hiring mode**, job posting, interview scheduling
- **Company rating** and response-based job visibility
- **Freemium billing** (Free/Premium plans)
- **Super Admin management** (revenue tracking, bulk jobs)

2. User Types

Job Seeker (Candidate)
Registers, logs in, completes resume, edits resume, triggers AI-based resume analysis, practices AI mock interview, applies to jobs, attends interview, and views feedback.

Employer (Company / Hiring Manager)
Registers as a company, enables "Hiring Mode", posts jobs, reviews applications, schedules interviews, and provides feedback/rating.

Admin (Platform Owner)
Manages users, jobs, settings, revenue tracking, user/team management, bulk job import (CSV), role assignment.

Super Admin *(NEW)*
Global dashboard, payment/revenue tracking, advanced analytics, notifications/feedback management.

3. Login and Registration

Any user can **register** using:

- Email, mobile, password, role selection (Candidate / Company / Admin).
- **Premium Status**: Free (limited) vs Premium (unlimited).

After registration, the user can **login** using:

- Email + password, or **"Continue with Google"**.
- **OTP via email** for forgot-password (6-digit, expires 10 min).

On first login, system redirects to **role-specific dashboard** (Candidate/Company/Admin/Super Admin Dashboard).

4. Candidate Dashboard & Resume Flow

When resume not filled: Dashboard shows **"Complete Resume"** card.

Clicking opens 7-step AI resume form:

1. **Personal Info**: name, email, phone, location
2. **Education**: degree, university, CGPA, year
3. **Work Experience**: company, role, duration, bullets
4. **Skills**: technical, soft skills, languages
5. **Projects**: name, stack, description
6. **Template Style**: ATS-friendly, modern, simple
7. **Preview & Download**: PDF export

AI-based resume analysis (ATS-focus):
After completion/upload, system performs **AI analysis**:

- **ATS score (0–100%)**: ATS compatibility
- **Keyword match**: vs common job keywords
- **Gap analysis**: missing projects/skills
- **Formatting check**: no tables, clear headings
- **Section suggestions**: stronger bullets per section

Resume History & Limits *(NEW)*:

- View/re-analyze old versions
- **Free**: 3 analysis/month | **Premium**: Unlimited

Resume edit: Add skills → **"Re-analyze"** → Updates ATS score, keywords, gaps.

5. AI Mock Interview (Practice + Official)

"AI Mock Interview" appears only when resume complete.

Two modes:
Practice Mode (Warm-up):

- Unlimited practice, resume-based questions (projects/skills/behavioral)

- Instant feedback, no score saved
- **Free**: Demo only

Official Mode:

- **10-15 min timed session**
- Records **final score + confidence** (Low/Medium/High)
- Used for job recommendations
- **Premium**: Unlimited sessions

6. Job Recommendations (AI-Filtered)

After **Official Mock Interview**, shows **"Recommended Jobs"** (Top 20):

AI filters using:

- **Resume match score** (0-100% via OpenAI GPT-4o)
- **Company rating/response speed**

Each job shows: Company name, rating, title, salary, location, job type.
1-Click Apply submits application with resume auto-attached.

7. Company Dashboard & Hiring Mode

Company login → Company Dashboard

"Hiring Mode" button:

- Opens **Company Details form**: name, industry, location, logo, description, website
- After save → **"Active Hiring"** status

Post Job:

- Daily jobs: title, description, skills, experience, salary, location, job type
- **AI Job Description Generator**: Enter title → AI writes full JD

Applications Tab *(ENHANCED)*:

- **Kanban ATS**: Drag-drop (Applied → Shortlisted → Interview → Hired)
- **AI Ranking**: Applicants sorted by match score (95% top)
- **1-Click Resume popup**: PDF + AI summary

8. Application Flow & Notifications

When candidate applies:

- **Real-time notification** (Socket.io): ting sound, dashboard badge, email

- Shows: candidate name, job title, resume link, **AI score**, confidence level

Company views: Application list, filter by status/score.

9. Interview Scheduling & Meeting Link

For selected candidates: **"Schedule Interview"** button.

Form: Date, time, mode (Google Meet/Zoom/in-person).
Auto-generates Google Meet link.

Candidate receives:

- **Push notification + email**: date, time, link, company, job title

10. Interview Decision & Feedback

Employer selects status:

✅ **Approved (Hire)**:

- Auto-generates **Offer details**: salary, joining date, documents
- Candidate: Accept/Reject offer

❌ **Rejected**:

- **Feedback form**: reasons dropdown (skills gap, experience, cultural fit)
- AI converts to **professional feedback text** for candidate

⏳ **In Progress**:

- Next round details: date, time, mode, preparation tips

Post-feedback: Candidate notification + **company rating update**.

11. Company Rating & Response Incentive

Public rating based on:

- **Response speed** to applications
- **Interview scheduling** consistency
- **Candidate feedback**

High-rating = Top job recommendations
Low-rating = Warning badge (motivates faster response)

12. Admin Dashboard & Job Management

Admin Dashboard includes:

- **Jobs Management** tab

- **User Management**: candidates + companies (view/ban)
- **Reports & Analytics**: total jobs, applications, active users
- **Revenue Tracking**: Premium transactions, graphs *(NEW)*
- **Team Management**: Internal staff *(NEW)*

13. Manual Job Posting (Admin)

Admin Dashboard → Jobs → Add New Job:
Job details: title, description, skills, experience, salary, location, job type
Target role: Specific company OR **"Platform-managed job"**
After save: Appears in candidate job lists + company dashboard.

14. Bulk Job Posting (CSV / Template Import)

Steps:

1. **Download CSV template** (pre-defined columns)
2. **Fill multiple jobs**: title, description, skills, location, salary
3. **Admin Dashboard → Jobs → Bulk Import**
4. **Upload CSV** → System shows: recognized jobs, row errors
5. **Confirm** → Imports valid jobs

Feature	**Free Plan ($0)**	**Premium Plan ($97 Lifetime)**
Resume Analysis	3/Month	**Unlimited**
Job Searches	5/Month	**Unlimited**
AI Mock Interviews	Demo only	**Full coaching**
AI Suggestions	Basic	**Advanced + Detailed**
Job Alerts	-	**30 Daily Curated**
Email Reports	Included	**Daily**
Portfolio Analyzer	-	**Included**

Use case: Campus/internship/government jobs in bulk.

15. Billing & Subscription System *(NEW COMPLETE SECTION)*

Freemium Model:

Payment Flow:

1. **Upgrade button** → Creates payment session (Stripe/Razorpay)
2. **Gateway redirect** → User pays (card/UPI)
3. **Webhook verification** → Updates isPremium: true + saves payment ID
4. **Instant unlock** premium features

Usage Dashboard: Tracks resume retries, job searches used.

16. Non-Functional Requirements

Security:

- Passwords: bcrypt hashed
- Auth: JWT tokens, Google OAuth
- OTP: Email verification (6-digit, 10 min expiry)
- Protection: Helmet headers, rate limiting

Usability:

- **Responsive**: Desktop + mobile (Next.js/TailwindCSS)
- **Clear UI**: "Complete Resume", "Re-analyze", "Hiring Mode" buttons

Performance:

- Concurrent users support
- **Real-time**: Socket.io notifications

Data Privacy:

- Users view/delete personal data
- **Cloud Storage**: Cloudinary (resumes/logo)

AI Engine: OpenAI GPT-4o (resume analysis, job matching 0-100% score)

Ye complete SRS hai - sab missing content add kiya (billing, super admin, AI details, limits, exact flows). Ab exam/project submission ke liye perfect hai!
