

## PROFESSIONAL SUMMARY

Detail-oriented QA Automation Engineer with 1 year of experience in Full Stack Development, now focused on software testing and automation. Proficient in writing test cases, identifying bugs, and building automation frameworks using Postman, Selenium, and Cypress to ensure application quality.

## TECHNICAL SKILLS

Postman (API Testing)

Selenium WebDriver

Cypress

JavaScript

Core Java

UI/UX Automation

JIRA (Basic)

Git/GitHub

React.js

Node.js

MongoDB / MySQL

## EXPERIENCE

Full Stack Developer / Tester

2025 - Present

1 Year Experience | MERN Stack Projects

- Integrated Redux Toolkit and handled state management for robust web applications.
- Conducted manual testing to identify and document bugs during the development lifecycle.
- Verified UI components for responsiveness and cross-browser compatibility.
- Collaborated on improving application quality and performance metrics.

## QA & TESTING PROJECTS

Automation Testing Practice

Personal Project

- Developed automated test scripts for web applications using **Selenium** and **Cypress**.
- Postman API Testing:** Validated REST APIs, checked response codes, and verified data integrity.
- Executed functional and regression testing to ensure software stability across versions.

ArtifactGeeks (Education Platform)

Core Developer/Tester

- Performed end-to-end testing for course enrollment and user workflow modules.
- Conducted UI validation using Chrome DevTools to ensure pixel-perfect design from Figma.

## EDUCATION

Bachelor of Arts (B.A) - Final Year

## STRENGTHS

- SDLC & STLC
- Detail Oriented
- Problem Solving
- Quick Learner

## CAREER OBJECTIVE

To secure a QA Automation Engineer role to apply testing skills and contribute to delivering high-quality software using Postman and advanced automation tools.
